## Education

### University of South Florida - Software Engineering Bootcamp 2023

- Comprehensive training in frontend and backend web development, data structures, and algorithms.
- 1:1 collaboration with an industry expert, resulting in several deployed full-stack projects.

### Hillsborough Community College - AA Business Administration 2020

Coursework in Leadership, Management Principles, Accounting, and Entrepreneurship.

## Experience

### Freelance - Software Developer Present

- Developed a healthcare site that enabled users to seamlessly login and manage appointments
- Integrated Shopify Buy Button to the platform for users to buy supplements directly through the site
- Rebranded WordPress site to custom javascript, nodejs solution resulting in increased site engagement
- Implemented comprehensive backend setup, including database management

### AmOne - Loan Matching Specialist 2019 - 2023

- Matched loan seekers with suitable loan products and lenders, generating over \$1.3 million in revenue.
- Managed high-volume of calls and ensured accuracy in loan file management.

### Ford Motor Credit Company - Wholesale/Titles Representative 2016 - 2019

- Advised dealership clients on automotive financing and managed state-to-state title transfers efficiently.
- Ensured accuracy in title information and streamlined documentation processes.

## Projects

### Driver's License Decoder - (React, React-Webcam, ZXing)

- Built a web app tool that allows users to pull data from a driver's license via their device's webcam
- Utilized React-webcam and Zxing to parse the PDF417 data and display it in a user-friendly format

### ModernEstate Real Estate Marketplace - (React, Node.js, Express, MongoDB, Firebase, Google OAuth)

- Developed a cutting-edge real estate marketplace in React from scratch using CRUD operations to enable users to manage property listings and upload images.
- Implemented authentication using JWT, Firebase, and Google OAuth, ensuring secure user access.
- Engineered a Node.js and Express backend REST API for data management with MongoDB database.

### ChatterBox - (React, Node.js, Express, PostgreSQL, WebSockets)

- Created a dynamic React-based chat app with real-time messaging functionality.
- Implemented PostgreSQL for data storage and encrypted user data using Bcrypt.
- Express and WebSockets to allow real time message sending and retrieval.
